NOTE

1. BuildHook for BuildConfig

```
oc new-project buildhook-demo

oc new-build \
    https://github.com/keoKAY/openshift_developer_materials.git \
    --context-dir hello-world-go --name=hello-world

oc get build
oc get bc

# to see the logs of hello-world-1 build
oc logs -f builds/hello-world-1

# set the buildhook
oc set build-hook bc/hello-world \
   --post-commit \
   --script="echo Hello from build hook"

# to set the command hooks
oc set build-hook bc/hello-world \
    --post-commit --command -- ./run-tests.sh

# to remove the hooks
oc set build-hook bc/hello-world \
    --post-commit --remove
```
